

Caprone

Best-Value Leather

Average Hide Size: 50 s.f.

Average Thickness: 1.0 - 1.1 mm

Average Weight: 2.75 oz.

Superbly priced for a leather of its quality, Caprone is prized for its durability and versatility. The hides are first aniline-dyed in the drum, then finished with an extraordinarily resistant yet silky-smooth, semi-aniline topcoat. Devoid of harsh chemicals or artificial texture, Caprone has a large, clean cutting area, and a soft, supple hand. This product is especially well-suited for high-traffic areas and public spaces.
