

Atlas

The High Performance, Water-Resistant Leather

Average Hide Size: 50 s.f.

Average Thickness: 1.1 mm

Average Weight: 3 oz.

Atlas is an extra-durable leather with a special protective breathable finish. This high-performance upholstery leather is chromium-tanned, fully aniline-dyed with a semi-aniline topcoat. Due to its extra protections, it is a perfect choice for high-traffic areas. Because of its water-resistant topcoat, Atlas is recommended for marine applications and settings where there may be some moisture, such as health spas and powder rooms. Atlas can be flame-treated in the drum for minimum quantities of 1,000 s.f.

- 13-1 Daisy
- 13-2 Froth
- 13-4 Cumin
- 13-5 Dijon
