

## The Calabria Collection

### The Faux Reptile Collection

**Average Hide Size:** 25 s.f.

**Average Thickness:** 1.2 - 1.4 mm

**Average Weight:** 3 - 3.75 oz.

This collection consists of three bovine upholstery leathers that reproduce the look and feel of authentic reptile and snake skin. Made especially for Cortina by an Old World artisan in Tuscany, each hide is individually processed by hand. Only the purest aniline dyes are used to recreate the depth and intensity of color previously found only in genuine reptile skins. Yielding much larger cutting areas than their lizard counterparts, and costing much less per square foot, these stunning, full-grain leathers are suitable for any type of upholstery application.

Patterns: Lorenza, Selvaggio and Ricky
