

Chamois Maxi

Luxury Cowsuede Embossed with Arabesque Pattern

Average Hide Size: 15 - 18 s.f.

Average Thickness: 1.4 mm

Average Weight: 3.5 oz.

Cortina introduces a first: reversible embossed suede. All ten Chamois colors are available in an arabesque embossment covering the entire hide. On one side, the heat and pressure of the embossment plate cause the recessed parts of the hides to darken, resulting in a striking contrast between the embossed and debossed surfaces. On the other side, the effect is more subtle, with less of a contrast and less depth.

Chamois Maxi is color-coordinated with Chamois, Chamois Romina and Chamois Romina Perforated.
