

Embossed Futura

Embossed Patent Leather

Average Hide Size: 25 s.f.

Average Thickness: 1.3 mm

Average Weight: 3.5 oz

This collection consists of three embossed patterns produced on two Futura colors. Futura holds the embossment plate well. The high-gloss finish is enhanced by the depth in the leather created by the embossing plate, resulting in an unusual, three-dimensional finish.

50 s.f. minimum. Available on half hides only. These patterns are available on all Futura colors as well as other Cortina leathers that are suitable for embossment. Other patterns are available. Lead time for embossing is typically one week.
