

## Glitterati

Textured, Multi-toned Metallic

**Average Hide Size:** 50 s.f.

**Average Thickness:** 1.2 mm

**Average Weight:** 3.25 oz.

Glitterati blends many of the features of our favorite leathers: depth, texture, sheen, brilliance and character. Best described as a multi-toned metallic leather with a bright and transparent finish, Glitterati is chromium tanned with a vegetable retannage, resulting in a leather of depth and substance. Special finishing products are used to create both roundness and softness, with a hint of wax and oil to obtain a subtly distressed and aged effect. Finally, a protective topcoat of crushed metal gives the hides a resistant yet brilliant finish.
