

Laser Cavallo/Laser Lace

Laser Cut Hair-on Hides

Average Hide Size: 25 s.f.

Average Thickness: 1.4 mm

Average Weight: 3.75 oz

Among the most unusual leathers available on the market today, Laser Cavallo and Laser Lace are produced with state-of-the-art laser technology. Hair-on Cavallo hides in brilliant solid colors are treated one at a time with a computer-drive laser which removes the hairs in a burn-out technique, creating patterns that range from animal prints to floral. The Laser Lace takes the product one step further by incorporating a perforation in addition to the complex laser-cut floral pattern.

Available in half-hides only.
