

## Neverland

Richly Textured

**Average Hide Size:** 50 s.f.

**Average Thickness:** 1.4 mm

**Average Weight:** 3.5 oz.

It is difficult for designers to find a leather that is both richly textured and soft. Most textured leathers are embossed, a process that stiffens the hide; but Cortina's Neverland is not embossed. A special dry-milling process retains the genuine grain of the leather and produces a soft, supple hand and natural pebbled texture. Neverland is heavyweight, but because of the purity of the aniline dyes, it feels fluffy and light. The fine transparent finish protects the leather and allows for depth and variation of color – a true connoisseur's leather.
