

Perlato

Luminescent Sheen, Pearlized Leather

Average Hide Size: 55 s.f.

Average Thickness: 1.1 mm

Average Weight: 3.0 oz

A transparent pearlescence is applied to the topcoat of this full-grain leather, creating a depthful, reflective quality with a richness of hue. Subtle and pleasing, Perlato's sleek finish breathes, yielding softly to the touch. Originally created for use in small private aircraft, where light and space are limited, Perlato will brighten up any space from a Gulfstream to a high-tech conference room. Perlato is treated with protective agents, making it an excellent choice for high-traffic settings. Perlato holds embossment patterns well.
