

Stonewash

Classic Naked Cowhide

Average Hide Size: 50 s.f.

Average Thickness: 1.0 mm

Average Weight: 2.75 oz.

Cortina Couture's Stonewash collection includes a plain cowhide and two full-hide embossment options, all available in the same eight colors. Stonewash has a silky smooth texture so desirable in luxury leathers, created by vacuum drying. This process also adds density to the leather, and careful hand polishing enhances its sheen. The pure aniline leather is produced from meticulously selected raw material that is aniline-dyed in the drum. No topcoat is applied to the surface, resulting in a classic naked finish. Stonewash has subtle "distressed" characteristics: a finish that will scuff and scratch and respond to everyday use.

Stonewash is color-coordinated with Stonewash Penelope and Stonewash Gigli.
